

Patient Name: \_\_\_\_\_

Date of Birth: \_\_\_\_\_

**An optomap® (digital image of the retina) will be captured annually for every patient UNLESS a waiver is signed.**

Dr. Moffat and Wagner strongly advise that ALL patients have an optomap® every year with the 200DX, the new scanning digital imaging system.

Retinal problems such as macular degeneration, glaucoma, retinal holes and detachments, melanomas, cancer and diabetic retinopathy can now be seen without dilation for most patients.

**EARLY DETECTION IS CRUCIAL!**

### **Advantages of the optomap® Retinal Exam**

1. Retinal image becomes a permanent part of the patient's medical record.
2. A complete thorough view of the entire retina is seen quickly and easily without dilation.
3. No blurred vision and no light sensitivity for the patient because dilation is usually unnecessary.
4. No wasted time for the patient waiting to dilate.

**The fee is only \$49.00 (it is not covered by insurance plans.)**
